## .About me {

I'm a Junior Frontend Developer with a background in photography and video editing who has recently completed a master in Web Design and Development (ID3) to transition into the world of web development.

My creative background has equipped me with a keen eye for design and a deep appreciation for aesthetics. I bring this unique perspective to my frontend development work, where I focus on crafting visually engaging and user-friendly interfaces.

Proficient in HTML, CSS, and JavaScript, I've also gained expertise in React and collaborative problem-solving. I thrive on challenges, value teamwork, and stay updated with industry trends.

I'm excited to merge my creative skills with web development to create immersive user experiences. As a Junior Frontend Developer, I'm committed to continuous learning and contributing to innovative projects that leave a lasting impact.

## .Education {

### Web design and development Postgraduate (ID3):

// ESAT - 2022/2023

At ID3, I further developed my skills in both web design (working with Figma) and web development, starting from HTML and CSS, moving through PHP with WordPress, all the way to creating a complete website with React.

### Audiovisual Communication Degree:

// University Jaume I - 2017/2021

Throughout my career, I gained artistic knowledge in photography, video, and some graphic design. Likewise, I also learned teamwork, organization within a project, and how to take control in moments of stress.

## .Experience {

### Brand design and web design and development -Genkoa:

// Valencia - jan.2023/apr.2023

As the second project of my ID3 postgraduate program, I collaborated with a cultural association in Castellón (Spain) to create their logo and website for their project: Genkoa. It's a platform where young creatives can connect to bring to life projects they have in mind but haven't been able to realize due to a lack of contacts.

### Freelance photographer:

// Valencia - sept.2021/febr.2023

By taking photographs at concerts, events, and scheduled photoshoots for emerging music groups, I've gained discipline and order in my work, especially when working alone. It has also taught me how to collaborate with individuals from different teams or professions than mine, and how to maintain clear communication with them.

### Communication Assistant:

//Agencia Eva Montesinos Comunicación  
- jun./sept. 2021

During my internship, I learned to manage a schedule with weekly events and to organize my small responsibilities within a company. Personally, I also learned to work in a team while at the same time being self-sufficient.
